CIFAR10

CLASS torchvision.datasets.CIFAR10(*root*: Union[*str*, Path], *train*: bool = True, *transform*: Optional[Callable] = None, *target_transform*: Optional[Callable] = None, *download*: bool = False) [SOURCE]

CIFAR10 Dataset.

Parameters:

- **root** (str or pathlib.Path) – Root directory of dataset where directory `cifar-10-batches-py` exists or will be saved to if `download` is set to `True`.
- **train** (bool, optional) – If `True`, creates dataset from training set, otherwise creates from test set.
- **transform** (callable, optional) – A function/transform that takes in a PIL image and returns a transformed version. E.g, `transforms.RandomCrop`
- **target_transform** (callable, optional) – A function/transform that takes in the target and transforms it.
- **download** (bool, optional) – If true, downloads the dataset from the internet and puts it in root directory. If dataset is already downloaded, it is not downloaded again.

Special-members:

`__getitem__`(*index*: int) → Tuple[Any, Any] [SOURCE]

Parameters:

index (int) – Index

Returns:

(image, target) where target is index of the target class.

Return type:

tuple
